MRPI® REGISTRATION

1.1.00536.2024

DATE OF ISSUE

31-5-2024

EXPIRY DATE

31-5-2029

SCOPE OF DECLARATION

This MRPI®-EPD certificate is verified by Anne Kees Jeeninga, Advieslab VOF. The LCA study has been done by Bob Roijen, SGS INTRON. The certificate is based on an LCA-dossier according to EN15804+A2 (+indicators A1). It is verified according to the 'MRPI®-EPD verification protocol November 2020.v4.0'. EPD's of construction products may not be comparable if they do not comply with EN15804+A2. Declaration of SVHC that are listed on the 'Candidate list of Substances of Very High Concern for authorisation' when content exceeds the limits for registration with ECHA.

PRODUCT

M6

DECLARED UNIT/FUNCTIONAL UNIT

1000 kg

DESCRIPTION OF PRODUCT

Filler, natural silica. Intended use according to DoP: fillers for concrete and fillers for asphalt and surface treatment for roads, airfields and other traffic areas.

VISUAL PRODUCT

MORE INFORMATION

DEMONSTRATION OF VERIFICATION	
CEN standard EN15804 serves as the core PCR(a)	
Independent verification of the declaration an data according to EN15804+A2 (+indicators A1)	
internal:	external: x
Third party verifier: Anne Kees Jeeninga, Advieslab VOF	
	
[a] PCR = Product Category Rules	

DETAILED PRODUCT DESCRIPTION

Raw materials are ground and mixed in ball mills. Damp materials are dried in order to yield a dry end-product. This drying process consumes natural gas. Some products are produced by mixing intermediates. All the drying, grinding, and mixing occur at Sibelco's facility.

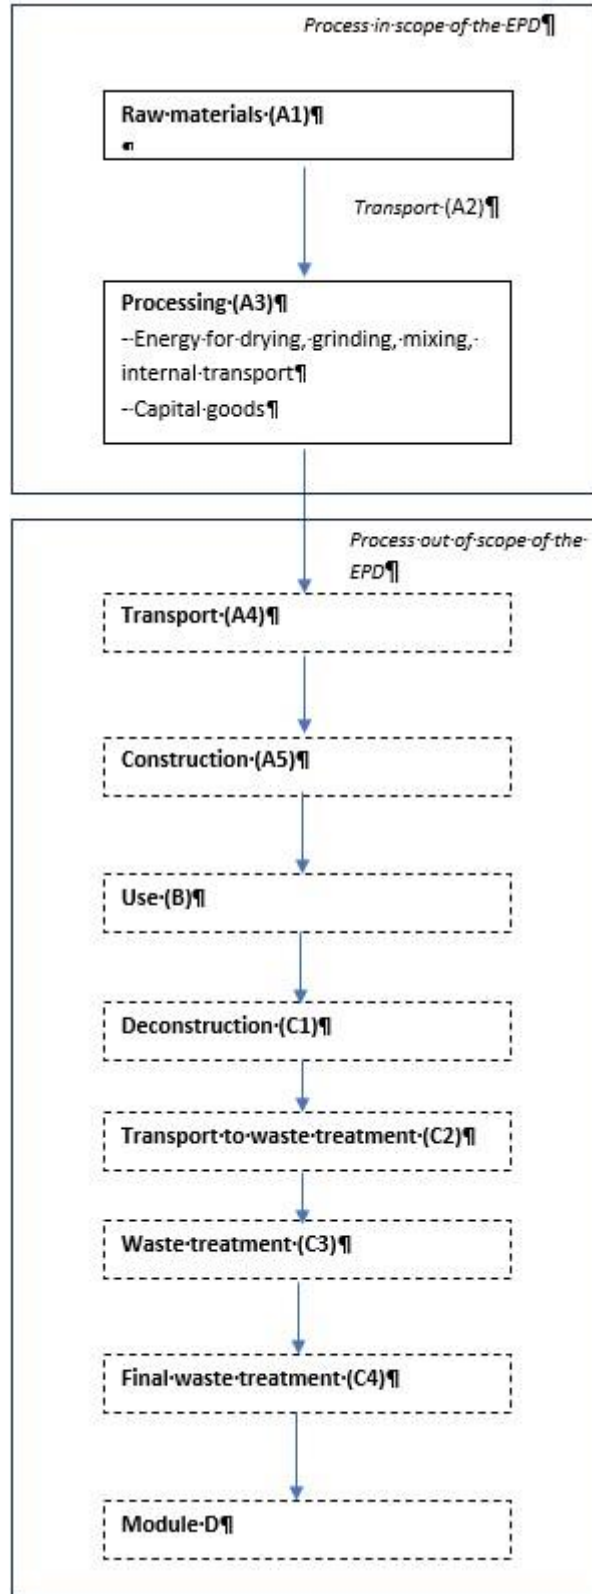

The product is delivered as bulk product.

Component > 1% of total mass	(%)
Raw material	Amount
Silica	100%

SCOPE AND TYPE

The filler is produced at the location of Sibelco Benelux BV in Heerlen. Since filler is a semi-finished product only the production phase is included. The LCA calculations have been made in Simapro using Ecoinvent database v3.6 (allocation cut-off) and the NMD process database v3.3.

PM = Potential incidence of disease due to PM emissions

IRP = Potential Human exposure efficiency relative to U235 [1]

ETP-fw = Potential Comparative Toxic Unit for ecosystems [2]

HTP-c = Potential Comparative Toxic Unit for humans [2]

HTP-nc = Potential Comparative Toxic Unit for humans, non-cancer [2]

SQP = Potential soil quality index [2]

Disclaimer [1]

- This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste.

Disclaimer [2]

- The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator.

- BBCpr = Biogenic carbon content in product
- BCCpa = Biogenic carbon content in packaging

CALCULATION RULES

This EPD is based on production data collected in 2021 over a complete production year: 2020. Virtually no materials or processes have been excluded from the study (cut-off rule is well below 1%). In case secondary materials are applied transport to the production location of Sibelco and processing (eg: drying) is allocated to the production of the filler. Infrastructure processes in Ecoinvent processes have been included, long term emissions in Ecoinvent processes have been excluded from the LCA calculations.

SCENARIOS AND ADDITIONAL TECHNICAL INFORMATION

The filler is produced by milling and grinding raw materials in crushers and ball mills. Moisture in raw materials is evaporated in order to yield a dry end product. The drying process consumes natural gas. Some of the products are produced by mixing intermediate products. However all of the drying, grinding and mixing takes place at the facilities of Sibelco and is included in the data collection and LCA calculations.

DECLARATION OF SVHC

No substances that are listed in the latest "Candidate List of Substances of Very High Concern for authorisation" are included in the product that exceeds the limit for registration.
